

The PCR100U Controller is a rugged multifunctional data controller with design of 5.5-inch sunlight readable HD touch screen and an alphanumeric keypad. Equipped with powerful Octa-core processor and android operating system. With professional IP67 rating, it is robust and reliable, suitable for various outdoor harsh environment. The large capacity lithium battery guarantees more than 15 hours of field working, which makes it excels at performing multiple surveying tasks throughout the day.

Characteristic

Easy to Carry

The PCR100U Data Controller weights only 370g with battery, users can take it anywhere they want.

Powerful System

Equipped with an Android 11 operating system, an 8-core 2.0GHz processor, 3GB of RAM with 32GB of storage. Configure 13MP rear camera.

Display Excellence

The device boasts a 5.5-inch display, with a resolution of 720*1440. It offering a seamless touch experience with support for up to 5-point capacitive touch. What's more, it enables effortless operation even with gloved or wet hands.

Smooth Operation

The device features an ergonomic design that provides a comfortable grip and an exceptional user experience during operation.

Various Data Communication Methods

The PCR100U Data Controller supports multiple communication methods such as Wi-Fi, Bluetooth, NFC and 4G, which satisfies the needs of users in most regions of the world.

Long endurance

Built-in high-capacity lithium battery ensures continuous working time of more than 15 hours under normal operation.

Robust Device Protection

The device is designed to withstand harsh environments and is tested to meet IP67 waterproof and dustproof standards. It is also built to withstand drops from a height of 1.5 meters, ensuring durability and reliability in challenging conditions.
